

Libre Franklin is PreVeil's primary typeface
It should be used in weights Regular,
Medium, **Semibold**, and **Bold**.

When used together, one weight should
always be skipped.

Example: Regular and Semibold, and
Regular and **Bold** can be paired, while
Medium and **Semibold**, as well as
Semibold and **Bold** should be avoided.

Use **Bold** for titles, and Regular or Medium
for body copy, depending on context and
font size.

Titillium Web is PreVeil's logo typeface. It
should be used only in context of the logo,
most often in **ALL CAPS**, and nearly always
in **bold**.
